

A photograph of a large industrial facility, likely a pharmaceutical or chemical plant. A prominent feature is a complex system of large, polished metal pipes and flexible hoses that run across the ceiling and connect to various pieces of machinery. The machinery includes large storage tanks, control panels with numerous buttons and gauges, and processing units. The background shows high ceilings with industrial lighting and structural beams. The overall scene conveys a sense of advanced industrial technology and automation.

VACUUM WASTE HANDLING

 **LUNDBERG** TECH
Our waste handling keeps production going

LUNDBERG TECH CONVERTS WASTE AND COVERS ALL ASPECTS OF WASTE HANDLING FROM PROCESS MACHINES

Capture
Waste in the process line where it is created. It enables higher production speed, less down time, while removing dust from production lines.

A photograph showing a capture system installed on a machine. The system consists of a large, flexible, white, bell-shaped hood that is positioned over the machine's output, connected to a duct system for dust extraction.

Convey
Waste by vacuum transport in pipe system. Can cover unlimited distances and amount of machines.

A photograph of a factory interior showing a vacuum transport system. A large, white, flexible duct is suspended from the ceiling and runs through the factory, connected to various machines and storage areas for waste collection.

Cut
Waste with the unique and reliable granulator. It adds value by reducing the volume and easily conveys the waste over long distances.

A close-up photograph of a granulator. It shows a large, circular opening with a metal grate inside, through which waste is being processed. The granulator is blue and white.

Collect
Waste in a sack, TubeBag or container. Flexible in placement for a clean waste handling process and easy disposal.

A photograph of a collection system. It features a blue container with a white lid and a yellow handle. The container is connected to a duct system for waste collection. The system is mounted on a yellow base.

Compact
Waste by a compactor into a container, bales or TubeBags. It reduces both space requirements for waste and cost of disposal.

A photograph of a compactor machine. It is a large, blue, rectangular machine with a white lid and a yellow handle. The machine is connected to a duct system for waste collection. It is mounted on a yellow base.

Clean
Environment as dust particles, created in the process, are removed.

A photograph of a clean room environment. It shows a large, white, rectangular machine with a white lid and a yellow handle. The machine is connected to a duct system for dust removal. It is mounted on a yellow base.

Industrial application

Lundberg Tech has with success designed and installed vacuum waste handling systems for nearly 40 years.

Lundberg Tech's solutions are able to cover all aspects of vacuum waste handling. The systems capture, convey, cut, collect and compact waste from an unlimited number of process machines.

Automatic filter, clean air return filter, antistatic devices and all kinds of valves and diverting systems can be included. Lundberg Tech also provides onsite installation and service as well as repair of wear parts.

Lundberg Tech's list of references is impressive in terms of numbers, geography and customers.

ABOUT LUNDBERG TECH

Lundberg Tech was established in 1946 and is today a privately owned Danish company situated on the outskirts of Copenhagen. Right from the beginning, Lundberg Tech worked on customer centered development, manufacturing and service solutions, which in the beginning of the 1980s brought the company to the subject of waste handling.

Today Lundberg Tech develops and manufactures a broad line of own granulators and cutters with

focus on high quality and fast delivery. As part of the unique waste handling concept Lundberg Tech also offers a product line of All-in-one units for easy installation as well as central systems which can include all possible features.

Thanks to a unique waste handling concept Lundberg Tech is now one of the world's leading suppliers of waste handling systems "from the process machine to the collection unit".

Today more than 4000 Lundberg Tech waste handling solutions are enjoyed by customers all over the world in places like Europe, USA, Canada, Australia, Japan, Russia and China.
